Zamiya Rawzatul-Uloom society has to impart many kinds of learning to women and Children and Specially Blind Students like the learning of concepts, rules, principles, aesthetic discrimination, etc., through problem-solving and other skills. Inherent to the acquisition of these Kinds of learning is the development of the right attitude and values.

It is important to realize that values can't be entirely taught as a subject in school and the inculcation of values can do it be left only to the moral science or value education teacher. Every teacher of this society is equally responsible for this undertaking inside and outside the classrooms, for value education.
